Who we are?

Portal Comm provides design and installation services for clean utilities and process systems for the pharmaceutical, cosmetics and other industries that need to comply with high purity standards.

Timeline

- 2014 Founded as a process automation and controls integrator; distributor of GE hardware and software.
- 2020 Merged with PCSI (process mechanical contractor) in 2020
- 2020 Acquired TFS Mexico
- 2021 Signed alliances with Stilmas and 3M Separation and Purification Division

Our Services

Basic and detailed engineering design:

- Process Systems
- Clean Utilities
- Supporting general utilities
- Automation and control

Turnkey systems

- Purified Water PUW
- Water for Injection WFI
- Clean Steam
- High Purity gases
- Clean in Place
- Sterilization in Place
- Process systems:
 - Aseptic and liquid forms
 - Creams and Ointments
 - Small and large volume parenterals

Process automation and control

- Batch control
- Control networks
- Data collection
- PLC, HMI and SCADA programming
- Design and assembly of control panels

Manufacturing **equipment maintenance, repair and overhauls**

- Production, filling and packaging equipment
- Conveyor belts design and fabrication
- Upgrading of control systems
- Disassembly, relocation, hook ups, start up.

Why choose us?

Resources

- Management team with 25+ years of experience
- Web based Project Management and Controls
- In-house labor for core activities
- Certified Welders
- Network of certified suppliers (vessels, heat exchangers, etc.) and specialty subcontractors (insulation, rigging, etc.)
- Quality system as per ISO 9000
- Own tools and equipment
 - Orbital welding
 - TIG Welding
 - Cutting, facing
 - Borescope

Alliances

System integrators for Mexico

* System integrators for the full range of filtration and membrane separators through our sister company TFS
